POLIN WATERPARKS & POOL SYSTEMS

Polin will be featuring a new King Cobra thrill waterslide, the new Racer series Surfstream, Creeksurfing, Splashcinema and RTM (Resin Transfer Molding) innovations in the sector of waterparks.

A model of King Cobra will be on display with a simulation video and a model of the Racer Series. King Cobra enables riders to race in two double tubes along a circular path with twists and turns before being

dropped into a pool alongside each other. The ride has been installed in Djubga Waterpark, Russia and Cobra Kingdom Waterpark, Maxx Royal, Antalya, Turkey. Another five contracts are about to be signed, plus, by mid-2012, there will be three King Cobras in Asia, two in the Middle East and one in America.
