New Sphere-Shaped Waterslide from Polin Waterparks & Pool Systems

Polin Waterparks & Pool Systems (Booth #5162) announced a new waterslide design—the Magic Sphere—at the Expo.

Emulating a rocket and a nearby planet, the Magic Sphere attraction first takes riders, who experience the ride together in a four-person raft, through a tunnel, then down a steep, 32-degree plunge into an transparent orb at 32 miles per hour. The riders then enter the orb, circling its perimeter until they shoot out of the bottom slide into a pool below.

“It’s a very fast ride, and due to its spherical shape, riders experience a new path every time they ride the attraction,” said Sohret Pakis, marketing manager for Polin Waterparks & Pool Systems, who added

that there’s been enormous interest in the new design since it’s debuted during the Expo. www.polin.com.tr
