CHICAGO, IL - **CENTAMAN Systems** is proud to introduce the new Centurion EasyGate SG. The Centurion EasyGate SG is the very latest in high tech entrance control systems and is designed to ensure only one person gains access for each authorised card presented. The EasyGate uses glass barriers in conjunction with optical detection technology to provide a high throughput / high security gate. The glass barriers are designed to work in a normally closed mode and swing inside the pedestal after a valid card has been presented giving the authorised user a clear lane to pass through. The barriers quickly close behind the authorised person, thereby deterring any unauthorised entry or tailgating.

EasyGate SG automatically sounds a local alarm if someone enters without authorisation additionally a relay can activate stricter security actions such as triggering CCTV, locking doors, or controlling elevators.

EasyGate SG barriers feature variable torque and speed settings to tailor the units to specific applications. Safety beams monitor the area near the barriers and deter the barriers from closing/opening on an obstruction. Additionally, the barriers feature a torque sensor and swing back if they detect an object when closing. When integrated with the fire alarm system and upon a fire alarm, the barriers automatically open to allow for free emergency egress. The barriers can also open in the same manner in the event of a power outage.

DENVER, CO - **SCS Interactive** puts the "splash" back into the splash park market with its new HydroLine™. The splash park concept has grown in popularity over the last 10 years and can now be found in municipal aquatic centers, parks, campgrounds, hotels, water parks, and resorts. It not only provides fun and excitement for children of all ages, but also requires a minimal capital investment, has low operating costs, and requires minimal supervision. With the HydroLine™, SCS brings "hands on" interactivity, climbable structures with tipping buckets and iconic elements to this market, offering a true waterpark experience in a small package.

The SCS Interactive HydroLine™ is made of all stainless steel. Within the HydroLine™ you will be able to choose from many product categories:
