## POLIN SPREADS ITS WINGS

Turkish company's projects find worldwide favour

ONE of the foremost European manufacturers of waterpark equipment is Polin Waterparks and Pool Systems of Turkey, which is currently working on the Aquaworld project, in Hungary, which will be the largest indoor waterpark in Europe when it opens later this year.

In recent months, the company has also completed a number of significant projects around the globe, including ones in Vietnam, Egypt, Iran, Ukraine and Russia.

The Vinpearl Waterpark in Vietnam is the first waterpark in the country situated next to the beach, on an island called Hon Tre Island in Nha Trang City. It was successfully completed by Polin and officially launched in in summer last year. The Vinpearl has a total area of 60,000m<sup>2</sup>, surrounded by a 30,000m<sup>2</sup> wide range of artificial mountains and a 960m lazy river.

In Egypt, the company completed the biggest waterpark in Africa, the Aqua

Vista Aquapark, which opened in Sharm El Sheikh with the co-operation of Polin's Egyptian partner. The previous biggest waterpark in Africa, the Hurghada Titanic Aquapark, was also installed by Polin.

In Iran, the company has completed an indoor park, Waterwaves Land Aquapark, the first aquapark in the country.

Polin has also installed a themed indoor waterpark project in Karkov, Ukraine. The Jungle opened last year and features a wide range of jungle-themed slides and other water attractions.

The Golden Bay Waterpark, the biggest waterpark in Russia, features numerous waterslides supplied by Polin. Last year it expanded further with the addition of several more slides from the company, including a TurboLance and Magic Hole ride. The park also added a kids' zone with six waterslides.
