Watery Fun Finds A Home in Iran
with Water Waves Land

WATERY FINDS A HOME IN IRAN

WATER WAVES LAND BECOMES THE LARGEST INDOOR WATERPARK IN THE MIDDLE EAST

Water Waves Land is Iran's
biggest waterpark.

As our lives become more mechanized each day, we need to find an outlet and have a little fun. The answer to the search for fun in the Middle East is Water Waves Land, a waterpark dedicated to provide unlimited fun for the whole family in a safe and a lovely atmosphere.

Water Waves Land is the biggest waterpark ever built in Iran, and its presence has brought new life to the region. It is located in Mashhad City in northeast Iran, and it is certainly the largest indoor waterpark in the Middle East.

The dream of Water Waves Land started in 2004 with its initial design phase, and finally in July it opened its doors to visitors with a great opening ceremony.

In attendance at the ceremony were the vice president of Iran, Ali Abadi; the governor of Khorasan province, Mohammadi Zade; the Khorasan sport minister; many countries' general consuls and approximately 30 media organizations.

During the two years of construction, engineers and experts worked hard to make sure that this project would one day be a preeminent park for our guests.

The concept of Water Waves Land is based upon combining innovative design with state-of-the-art technology. According to the plan, slides and attractions offer a maximum level of variety, capacity and safety. A combination of these elements ensure an enjoyable time for all visitors.

A TRIP INSIDE

Visitors to Water Waves Land cross the threshold into a new world once they set foot inside the entrance. The roman architecture and relaxing colors of the lobby set the stage for what is to come.

FUN

To the right are the kids' pool and adults' pool, and directly ahead is the wave pool. But the fun doesn't end there. There are seven pools, 13 waterslides, the "Lazy and Crazy River," a kids' play area and many other attractions at the park.

Details on the park's attractions:

Wave pool – A 1000-square-meter area and nine different kinds of waves make this one of the most popular attractions for our guests; it is like bringing the sea into the city with its different tidal movements.

Rivers – Our rivers, with 220 meters length, 3.5 meter width, and 1.10 meter depth, provide a unique ride experience.

Kids' play area – One of the main goals is to give children exactly what they are looking for in a waterpark, so we tried to do this by dedicating a special pool, slides and aquatic animals designed specially for our little guests.

Sauna & Jacuzzi – Want to know what's really fantastic? Relaxing amongst the bubbles of the jacuzzi, or relaxing and enjoying our traditional sauna or steam sauna. A Turkish bath, restroom, foot massage and cold pool are all available as well.

While all these attractions help make Water Waves Land a hit with park guests, what really wins them over are the waterslides. The waterslides, kid's equipment, filtration, water circulation, wave pool and leisure river systems are supplied by Polin Waterparks & Pool Systems, one of the top water-slide manufacturing companies in the world located in Istanbul, Turkey. We felt lucky to have the chance to work with such a professional team from the design phase to the end phase. We have chosen a wide variety of slides, each aimed at different tastes.

• **"Space Hole"** – "Space Hole" is one of the largest and most popular Polin slides for speed riding. It is engineered to create ultimate excitement. You first experience the excitement of an enclosed flume, continuing

with several whirls by the sides of the bowl with the centrifugal force and finally ending with falling from the hole.

- **"Black Hole"** – This enclosed slide is quite simply the most popular ride in the park because it offers an incredible, unique ride experience. The natural effects create a visual harmony in the water inside the ride, which makes this ride even more attractive for riders. "Black Hole" has the same section as "Rafting Slide." If you wish, we can combine these two into one slide where you will enjoy the experience of both an open and a tunnel slide with only one slide.

- **"Kamikaze Slide"** – "Kamikaze" is expertly engineered to deliver a high-speed experience. "Kamikaze's" configuration features a slide path consisting of more than just one fall. You experience the excitement and the fun of falling over a multi-bump slide path, ensuring a soft landing with maximum safety. This crowd-pleasing slide is one of the favorites of park visitors.

- **"Multislide"** – This interactive slide delivers the joy of head-to-head action. "Multislide" has a waterslide
