POLIN

Another totally new product from the company is the "Uphill Multi Surf", which is an uphill and downhill slide in a roller coaster style. Similar to products from other producers, the riders are propelled by jetted water on their way uphill. However, the Polin attraction has a waterslide

Photos: Polin

The water slide manufacturer from Turkey is overtaking other producers more and more. Recently the company was able to finalise its first contract with the USA, which involves the adaptation of various slides for the Best Western and Holiday Inn hotels.

New in the company product range is the family slide "F 3000" which has a huge basin diameter of 300 cm. Interesting here is also the fact that this type of slide can be combined with various elements, for example a "Kamikaze"-drop or a "Black Hole"-tunnel sequence.

path with 2 to 6 individual lanes.

The new RTM-technology is used on all Polin slides, which produces luminous colours and a smooth slide experience. ■
