

Driven by Pomvom experience™  
AI tech that brings the future  
to your amusement park!

### VISITOR'S EXPERIENCE

**Simple, fast, user friendly  
... and most of all great fun!**

AIPIX™ helps Amusement Parks  
become smarter in the "Offline"  
world and engage better in the  
"Online" world.

Pomvom experience seamlessly,  
effortlessly and automatically  
distribute memories to park visitors  
- personally connecting them to  
the park through their visit!

Driven by Pomvom experience™  
AI tech that brings the future  
to your amusement park!

### NEW EXPERIENCE NEW OPPORTUNITY

The "Pomvom experience" AI tech takes  
your park to the next level - increasing  
visitor's engagement and giving them a  
chance to enjoy their highlights, moments  
and memories - all day long!

Pomvom's solution doesn't only increase  
your park's marketing efforts by giving it  
a technological edge, but also improves  
monetization and R.O.I. on each visitor with  
a variety of engaging photography tools  
from amazing stills to special point of view  
live video you couldn't get any other way.

explore > buy > share  
by using only their "selfie"

### BUSINESS INSIGHTS

Personalised & General Insights  
and data analytics including  
usages, gender, age, locations,  
time and even relations

## POMVOM'S NEXT LEVEL IMAGE RECOGNITION TECHNOLOGY

**We capture the whole experience making  
sure your visitor never miss a single  
memory throughout the whole journey!**

Common face recognition systems needs  
a clear portrait shot to properly detect the  
individual but **Pomvom Experience™** is much  
more complicated and advanced.

With our specially developed artificial  
intelligence architecture, **Pomvom  
Experience™** can detect the individual even if  
his eyes are closed, his face is partially blocked  
or is widely screaming.

This unique system provides real time, live  
video and stills, from the best point of view.

#### Dynamic Model

The model is enriched from  
the transaction

#### Micro Cells

Unlimited number of small  
recognition engines

#### Distributed Deployment

Global, regional, and local clusters

#### Multidimensional Model

Face, clothing, artifacts,  
relationships, time

#### Neural Networks

Micro cells are connected to  
cluster people

#### Elastic Model

Local knowledge is learned  
from user's activity
